

WHITESPIRE BIRCH

Betula populifolia 'Whitespire'

Height: 40-50' **Spread:** 20-30'

Location: Zone 4, sun to part shade, heat tolerant

Shape: Narrow, pyramidal crown

Foliage: Dark, glossy green

Notes: This is the beautiful native white-barked birch, found growing in the northern states around the Great Lakes. Pyramidal in youth turning oval in maturity. Bark does not peel like River Birch.
