

BLOOMERANG LILAC

Syringa 'Penda'

Height: 4' **Spread:** 4'

Location: Zone 4, full sun, well-drained soil

Shape: Dwarf, compact crown, grafted on std

Foliage: Green

Notes: 'Bloomerang' blooms in spring and then again throughout the summer. It goes through a rest period in the heat of the summer and then flowers again until frost. Trained into a tree form, this compact beauty makes a great ornamental tree for your landscape or garden.
