

SWAMP WHITE OAK

Quercus bicolor

Height: 50-60' **Spread:** 45-60'

Location: Zone 4, sun, wet to well-drained soil

Shape: Open, narrow, rounded crown

Foliage: Dark green, tan to red in fall

Notes: Excellent in both wet and upland soils, this tree has a coarse and slightly incised leaf, and acorns borne on 2- 4" stalks. It shows good transplant success. Named a 1999 "Great Plants for the Great Plains" Award winner.
