

POLAR JOY® ROSE TREE

Rosa 'BAIore'

Height: 2-4 **Spread:** 3-4'

Location: Zone 4, sun

Shape: Rounded, grafted on a standard

Foliage: Light green

Notes: Polar Joy is a hardy tree rose. This introduction from Bailey Nurseries award-winning rose breeding program was developed especially for the northern garden. The soft pink blossoms combined with the light green foliage gives the impression of spring, apple blossoms. Polar Joy has excellent disease resistance. Unlike other tree roses which are actually 2 or 3 different roses grafted or budded together (the root, the stem and the top), Polar Joy is the same hardy rose plant from top to bottom giving it unmatched hardiness.
