

# SWISS STONE PINE

*Pinus cembra*

## ALGONQUIN PILLAR

**Height:** 15-16'      **Spread:** 6-7'

**Location:** Zone 3, sun, well-drained soil

**Shape:** Pyramidal, upright

**Foliage:** Silver/green, two-toned

**Notes:** Naturally occurring cultivar found in the northern forests of Ontario that is extremely cold hardy. Retains its foliage better than other pines. Low maintenance and uniform growth habit.

## PRAIRIE STATESMAN®

**Height:** 25-30'      **Spread:** 10-15'

**Location:** Zone 2, sun

**Shape:** Dense, upright

**Foliage:** Emerald-green w/ silvery-blue overtones

**Notes:** Elegant evergreen tree with a strong central leader. Its lateral branches curve upward and slightly inward resulting in a narrow, dense growth habit.

## SILVER WHISPERS™

**Height:** 12'      **Spread:** 6'

**Location:** Zone 3, full sun

**Shape:** Dense pyramidal

**Foliage:** White-striped dark green needles

**Notes:** A very hardy evergreen for spatially challenged landscapes. Exceptional form is densely packed with white-striped dark green needles that produce a useful silvery plant. Accented with 3 inch long decorative violet-blue cones.
