

COLORADO SPRUCE

Picea pungens

Height: 40-60' **Spread:** 15-30'

Location: Zone 3, full sun, wet to dry soil

Shape: Pyramidal, upright, symmetrical

Foliage: Sharp, green to blue needles

Notes: This very popular evergreen conifer has a symmetrical, pyramidal form. A handsome tree with rigid tiered branches densely covered with stiff gray-green to blue-green needles. The dense foliage needs little shearing. Excellent as a specimen, hedge, or windbreak. Likes fully exposed, well drained locations. Best in full sun.
